## FIRE REQUIREMENTS

Fire requirement notes are for guidance only, always get approval from your local fire authority. Fire requirement must be stated clearly on customer purchase order. All products have a non-removable upholstery cover unless stated otherwise.

## CRIB 5

Treatment upon request. Please contact E&S for pricing.

## COM/COL

COM/COL subject to sample fabric test, please supply minimum—100mm x 100mm. Please allow an additional 2 weeks for fabric and leather testing. The lead time will only commence once the material has been successfully approved by the factory.

## CLEANING UPHOLSTERY FABRIC

Regular cleaning is important in order to keep the upholstery textile looking its best and to prolong its life. Dust and dirt wear down the textile and reduce its fire-retardant properties. Vacuum frequently, ideally every week, at half power where appropriate. Wipe upholstery fabrics made from polyurethane with a dry or moist cloth. It is usually recommended that upholstered furniture with normal commercial use

should be cleaned 2-3 times a year. Upholsteries in private households usually need less frequent cleaning. Appropriate maintenance and regular cleaning can prolong the textile's life cycle and reduce costs for renovation and repair, replacement and disposal.

## CLEANING LEATHER

Leather is a living material that matures beautifully if treated properly. You should not place leather furniture closer than 20-30 cm to a radiator or in direct sunlight. Do not use harsh chemicals, saddle soap or unidentified leather cleaners, solvents and oils. Keep free of dust and grit. Vacuum clean leather often with a soft brush. Regularly clean contact areas such as arm and head rests to avoid build-up of perspiration and body oils, which may discolour leather. Leather can be maintained by wiping with a cool damp cloth. For tougher soiling, use a PH balanced soap on a cloth and rinse. Remember to always use cool water. Repeat if needed. Mild leather cleaning products and protection treatments are widely available, always seek instruction from the manufacturer. We recommend professional cleaning with specialist leather cleaners and conditioners in strict accordance with manufacturer's instructions.
