Year

2019

Designed in Denmark
Produced in the EU

With our newest part Cabinet, we finally bring the possibility to hide away those things that you don't want on show – we all have them.

The cabinet can be placed at any height within the system, and still allows for shelves to be placed at either side. The cabinet comes flat packed and consists of two custom shelves, two side panels, back plate, doors and an optional inner shelf. As with the rest of the system, the cabinet is built with no extra tools. The sides are held together by dowels and the doors are simply clicked in place.
