U.K. FABRIC AND LEATHER COLLECTION INDOOR

APRIL 2021

The upholstery materials (fabrics, velvets, leather) applied to the products may present variations in tone from one batch to another. Some materials present variations which are more accentuated since they are natural materials, as in the case of various types of leathers or fabrics left in their natural state or only partially dyed.

From time to time the surface of the skins have marks and imperfections such as scars, wrinkles, diversity in luster or tonality of colours, spots, etc.

These are even more evident when the skins have been treated minimally, as in the case of our “Pelle Naturale” leather.

These are natural characteristics of the skins which give evidence that they are genuine leathers and emphasize their natural beauty, and which are therefore understood as corresponding to the quality which we guarantee for our products.

Our samples are indicative, not definitive.

We must point out that cow or pony skins have imperfection and with time are subject to partial loss of hair on the points of major stress.

Samples supplied on request in relation to single orders do not guarantee the identity of the colour of the product eventually supplied.

Exposure to direct sunlight of the products upholstered in fabric or leather is not recommended as it will alter the colours.
