GENERAL INFORMATION

**LEATHER GROUP 1**

**PRESTIGE**

Leather type:  
Slightly corrected, full grain leather, 1,2 - 1,5 mm, chrome tanned. Aniline dyed and surface treated.

Characteristics:  
Soft leather with a matte surface. Extremely durable leather that is highly resistant to scratches and hard use. Smudge proof, water repellent and dirt repellent.  
SORENSENLEATHER.COM

**ZEA**

Leather type:  
Traceable full grain semi-aniline leather made from Danish ox hides, 1,2-1,4 mm.

Characteristics: Zea is processed in a way that achieves a uniform surface, which results in every piece being consistent. The protected finish ensures that the leather is resistant to scratches, stains and fading due to sunlight.  
NORDICSPoor.COM

**LEATHER GROUP 2**

**NEVADA**

Leather type:  
Full grained, 1,3 - 1,5 mm, vacuum tanned (chrome-free) aniline leather. Natural surface with a light surface coating. Natural marking, visible insect bites, scars and wrinkles contributes to the exclusive look of the leather. Due to the natural look, there may be variations of texture and shades.

Characteristics:  
The hides are firm, smooth and matte with a beautiful, natural character and durable qualities. Semi water and dirt repellent.  
CA-MQ.COM

**LEATHER GROUP 3**

**CERVO**

Leather type:  
Full grain aniline leather from Scandinavian bull hides, 1,5 mm-1,7 mm, chrome tanned. Natural surface with no or very light surface coating. Very exclusive selection with only a small amount of natural marking.

Characteristics:  
Very soft, warm leather with a beautiful visible grain structure and great seating comfort. Open grain structure that develops a natural patina over time. Semi water and dirt repellent.  
STOLZ.BE/EN/

**NOHR**

Leather type:  
Traceable, full-grain pure aniline leather from Danish bull hides, 1,1-1,3 mm. Chrome-free tanned, biodegradable and compostable. Natural smooth surface without surface finish. Highest quality, where insect bites and other natural marks may appear as part of the leather's character.

Characteristics:  
Very nice, soft, warm leather with beautifully marked grain structure and great sitting comfort. Open grain structure that patinas in use. Lightly water and dirt repellent.  
NORDICSPoor.COM/EN

**LEATHER GROUP 4**

**VELVET**

Leather type: Full grain aniline leather called nubuck made from Scandinavian bullhides, 1,4 - 1,6, chrome tanned. The aniline hide has a velvety, soft, luxurious touch and has been slightly sanded to obtain a matte effect. Small variations in color may occur.

Characteristics:  
Nubuck Velvet is ScotchguardTM protected during the tanning process and is therefore water and stain repellent but will develop a patina over time.  
STOLZ.BE/EN/

**ORIGIN**

Leather type: Traceable full grain aniline leather made from Danish ox hides, 1,1-1,3 mm. Chrome free mineral tanning, biodegradable and compostable. Natural feel and look with no surface coating. Top aniline quality leather where insect bites, scars, wrinkles, and other natural marks is part of the characteristics.

Characteristics: The exclusive leather will change over time as a result of use and exposure to light and air. With no protective coating, the leather is susceptible to water, grease, and stains and will develop a natural patina, which only contributes to the unique characteristics of the exclusive leather.  
NORDICSPoor.COM

**ELEGANCE**

Leather type: Full grain aniline leather, 1,2 - 1,4 mm, chrome tanned. Natural surface with no surface coating. A luxurious leather, where insect bites, scars, wrinkles and other natural marks is part of the characteristics. Due to the natural look, there may be variations of texture and shades.

Characteristics: With no protective layer, the natural leather is sensitive to light and air and therefore it will develop a great patina over time. The leather is susceptible to water and stains, which contributes to a natural patina as part of the characteristics.  
SORENSENLEATHER.COM

**VITA**

Vita is an exclusive and soft full-grain pure aniline leather that is chrome-free tanned and without any kind of surface treatment. The leather is certified by Dyrenes Beskyttelse and made from the finest raw hides from North Jutland.

Characteristics: Vita has a smooth and luxurious surface, where all natural marks such as insect bites, scars and wrinkles are visible and a natural part of each individual skin's distinctive character. Vita is available in a beautiful cognac color and will patina strongly over time, depending on use and exposure to light.  
SORENSENLEATHER.COM

**VEGETAL**

Leather type: Full grain aniline leather from Scandinavian bullhides, 1,2 - 1,4 mm, vegetable tanned leather. Natural surface with no coating. A luxurious type of leather, where insect bites, scars, wrinkles and other natural marks is a part of the characteristics. Due to the natural look, there may be variations of texture and shades.

Characteristics: The classic vegetable-tanned leather will develop the best patina over time because it absorbs light and air. The uncolored vegetable-tanned leather will develop a patina from light sand color to cognac. Vegetable-tanned leather is susceptible to water and stains, which contributes to the natural patina and makes this leather extremely luxurious.  
STOLZ.BE/EN/

**SKANDILOCK SHEEPSKIN**

Leather type: Curly 1,7 mm Australian sheepskin which is highly suited to furniture upholstery and furnishings. The skin is naturally curly but the structure of the wool can vary both with regard to the curls and the color tones.  
SKANDILOCK.COM
