

# Offset Chair

## **Congrats on your new Offset Chair!**

Offset Chair is a dining chair shaped for comfort and defined by a strong visual presence.

Two continuous steel lines in chrome or black outline the chair, with the back legs sweeping forward to meet the backrest, creating its distinctive offset profile. The result is a light, open expression that fits naturally into dining rooms, workspaces, cafés and shared settings.

It ships flat-packed and assembles with ease. The steel sides connect beneath the seat, while the seat and backrest lock into place to form a stable structure with minimal components. Offset Chair is available with either a wooden seat or an upholstered seat for added comfort.

## **Assembly:**

Please see the following assembly instructions or find them at [www.moebe.dk](http://www.moebe.dk)

## **Taking care of your chair:**

If you need to clean your chair do so with a damp cloth using a mild detergent if needed. Do not leave your chair wet or soaked for longer periods of time and always remember to dry it off after cleaning.

## **5 Year Warranty**

We believe in what we do and in the quality of our products. That's why we give you a 5 year warranty. This guarantee covers any functional, material or manufacturing defect on any product you buy from us for private use.

## **Safety and durability**

The durability and safety of the chair has been tested by the Danish Technological Institute according to the European standard for chair EN16139:2013, L1 and has passed this test.

## **Spare parts – Keep it going forever**

All our products are component based and have been designed this way to make repairs simple. You can find and purchase all spare parts for your product on [www.moebe.dk](http://www.moebe.dk) for a period of at least 5 years after your purchase. It should always be cheaper and easier to repair, than buying new.

## **Recycling**

Whilst we hope that your MOEBE Offset Chair will serve you well for many years to come, if you do at some point wish to recycle it then it is easy to do so. Simply split the product down into its separate parts and recycle them by material.

All parts can be recycled. How this is done depends on local regulations and facilities.
