

Specification Sheet

Suspended Wall Lamp

Suspended Wall Lamp is a sculptural wall light that allows you to adjust both the height of the shade and its distance from the wall.

It consists of four main parts: a solid oak wall bracket, a stainless steel support wire, a pivoting arm, and a cable with a shade. Once mounted, the bracket holds the cable in a central groove. The steel wire is first hooked over the top of the bracket to guide and tension the cable, then threaded through the base to lock the pivoting arm in place. Together, they create a flexible structure that lets you raise or lower the shade and pivot the lamp closer to or further from the wall.

Made in the EU from FSC-certified and EU Eco label-compliant materials.

Dimensions

70 x 19 x 65 cm (H x W x D)
Adjustable height and depth

Colour

Oak, Smoked Oak

Material

FSC-certified oak
Ceramic
Textile

Rec. retail price

350,00 EUR

Cable

4 meters, white textile cable

Light source

G9 LED bulb

Max watt

5W LED

Voltage

220-240V~

Frequency

50/60Hz

Year

2025

Designed in Denmark

Produced in the EU
