## *GUBI's Recommended Outdoor Fabrics*

### DEDAR, LIBERA

Dedar's Libera has been tested for UV lightfastness and the results allow it to be used in outdoor conditions. However, when the fabric is exposed to constant and extreme sunlight it might result in color variances. This means that Dedar's Libera might become lighter when exposed to extreme UV over time. The outdoor performance of the fabric will protect the filling of the furniture and keep the drying time after rain to a minimum.

### LIMONTA, UDINE

Limonta's Udine fabric has been tested for outdoor conditions and is suitable for outdoor products. The outdoor performance of the fabric will protect the filling of the furniture and keep the drying time after rain to a minimum.

### LIMONTA, LORKEY

Limonta's Lorkey fabric has been tested for outdoor conditions and is suitable for outdoor products. The outdoor performance of the fabric will protect the filling of the furniture and keep the drying time after rain to a minimum.

### DEDAR, CHEVRON OUTDOOR FR

DEDAR's Chevron Outdoor FR fabric has been tested for outdoor conditions and is suitable for outdoor products. The outdoor performance of the fabric will protect the filling of the furniture and keep the drying time after rain to a minimum.

### ENZO DEGLI ANGIUONI, LINEE

The Enzo Degli Angiuoni, Linee fabric has been tested for outdoor conditions and is suitable for outdoor products. The outdoor performance of the fabric will protect the filling of the furniture and keep the drying time after rain to a minimum.
