

wästberg / w 103 sempé

Product Information

LEDs have a very long lifespan. That should also be the case with the actual fixture, in which they are installed. This elementary lamp is meant to be as simple and solid as a nail or a push pin. As with traditional tool machine lighting, the mechanics are sturdy and long-lasting. The lamp combines solidity and lightness: a thin beam joins the two opposite pieces of the lamp, a heavy foot and a delicate shade.

A w 103 sempé pendant lamp can be a single hanging shade or a combination of shades. Two elements of the w 103 table lamp are reused in the suspended lamps; the shade that is identical, and the cleat that is placed on the top of the shade to become a connection point for various shade constellations. It can be used to attach multiple shades to a long rail for linear constellation, or to smaller rails that can be joined together like Meccano to create polygons. The rail structure is solid, yet visually light and the lines are softened by the round shapes of the shades.

The pendant lamp shades exists in different colour tones – bright, soft, clear, dark – and can be arranged in any colour combination, using the seven standard colours.

Design: Inga Sempé

Material	The w 103 sempé lamps are manufactured from aluminium and steel. The base of the table lamp is made of cast iron
Integrated LED with optical lens (table, pendant)	The light technology is based on an energy-efficient, high quality, LED solution, which gives a warm white light.
Indirect light (table)	The shade acts both as glare-protection and as a reflector. The light is projected into the shade, giving a smoothly and pleasant indirect light.
Multiple mounting options (table)	The fixture can be mounted in three different positions/ angles on the base, as well available on the clamp version.
Adjustable shade (table)	The shade can be adjusted 166° (+/- 83°) around its horizontal axis.
Glare-protecting shade and diffuser (pendant)	The shade protects from glare while the diffuser gives an evenly distributed light.
Dimmable (pendant)	The w 103 sempé pendant has integrated dimmable electronics, enabling dimming from external dimmers and lighting control systems.
Coloured inside (pendant)	Using LEDs to project the light directly downwards, the shade is not used as a reflector. This gives the option of painting the inside of the shade in the same colour as the outside, without destroying the quality of the light outside. The result is a beautiful and at the same time, playful effect as a small amount of light lights up the coloured inside of the shade.
Rail mounting (pendant)	Any number of pendant lamp shades and any combination of the seven single shade colours can be mounted onto a black or white straight rail. Two or three black or white shades on a black or white rail are available as standard articles. Various colour combinations and amounts of shades are available, made to offer.
Hexagonal rail (pendant)	A combination of pendant lamp shades in the colours sulfur yellow, beige red, coral red, reed green, silver grey and deep black, mounted on a hexagonal-shaped black rail is available as a standard article. Any combination of the seven single shade colours mounted on a black or white hexagonal rail are also available, made to order.

Wästberg is a Swedish lighting company aimed at bringing back light to human proximity, by restoring the private spheres man has been deprived of during decades of misguided pursuit of efficiency and standardisation. The universally acclaimed lamps are created in close collaboration with some of the world's most renowned architects, designers and lighting experts, and have earned prestigious awards for their combination of aesthetics, cutting-edge technology and resource conservation.
